"WATER POWERS OF EASTERN CANADA". ✓
Scenic, Screen time 15 minutes.

The extensive part played by water in the industries of Eastern Canada is vividly revealed in this Essanay scenic reel. The countless falls and rapids in the Provinces of Ontario and Quebec are shown as well as the sluice gates capable of generating 160,000 horse power. The artistic side of Canada is not omitted, for some picturesque vistas along the St. Maurice River are shown, including Grand Mere rock, which reveals the perfect profile of a grandmother type. Niagara, the famous water falls, was photographed for this picture, with its "harness" that generates 2,000,000 horse power. The industries dependent on this source of power supply you will also see.
